

**Ander Francisco Moisés
González González**

Software Engineer

ABOUT ME

Software Engineer specialized in Full Stack development with JavaScript and TypeScript, with more than 2.8 years of experience designing and developing modern, scalable, high-performance web applications, improving development processes through the use of AI. Experience working with React, Astro, Node.js, Express, and SQL and NoSQL databases, as well as implementing test automation and software quality improvement in enterprise environments.

Focused on the creation of modern architectures, performance optimization, API integration and deployment in cloud environments, applying good development practices, DevOps and Agile methodologies.
